To Whom It May Concern,

Re: Homeless Warming Shelter in McAdam Park

Do we need a warming shelter? Absolutely! But not in that location. We need to consider everyone in our community.

The proposed site for this shelter is less than 30 feet away from Cowichan Preschool. A well-known and well respected non-profit society that has recently celebrated its 40th anniversary in that location, teaching children more than just their ABCs.

Over the last 40 years there are thousands of our community members who have attended the Preschool and learnt how to grow and belong to a community outside of their family unit. How to accept and have compassion for others, how to listen and respect others and the spaces around us.

Over the last several years the condition of McAdam Park has deteriorated into a place where needles and other bio hazardous materials litter the ground. This disrespect, from those who are abusing that space, has encroached upon the safety of the children and families who attend the Preschool and every other member of our community. What does that teach our children?

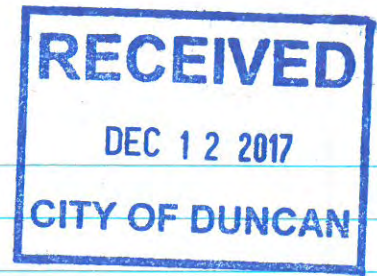

Putting a warming shelter at this location, will increase the abuse and disrespect shown to everyone in our community. As tax payers we pay for maintenance of our parks so we can enjoy a safe outdoor space to take ourselves and our families. It's not safe, and the clean-up bill is only going to increase.

Let's have compassion for everybody. Let's put our children first.

Please reconsider this proposal.

Sincerely

Kathy Weismiller

Enclosed please find a
petition circulated around
Mac Adam Park.

We hope you will take these
into consideration
when making your decision

The City of Duncan has been asked to consider the use of the field house at McAdam Park as a temporary warming shelter this winter. This park and surrounding neighbourhood has already been negatively impacted by the transient population setting up tents, engaging in illegal and unsafe behavior, and leaving garbage and drug paraphernalia throughout the park. We believe that the use of the field house as a warming shelter will only increase these activities in the park and further create an unwelcome and unsafe environment for the greater community. Your petitioners respectfully request that the City consider an alternate location for the warming shelter.

We, the undersigned, oppose the use of the field house at McAdam Park as a temporary warming shelter.

The City of Duncan has been asked to consider the use of the field house at McAdam Park as a temporary warming shelter this winter. This park and surrounding neighbourhood has already been negatively impacted by the transient population setting up tents, engaging in illegal and unsafe behavior, and leaving garbage and drug paraphernalia throughout the park. We believe that the use of the field house as a warming shelter will only increase these activities in the park and further create an unwelcome and unsafe environment for the greater community. Your petitioners respectfully request that the City consider an alternate location for the warming shelter.

We, the undersigned, oppose the use of the field house at McAdam Park as a temporary warming shelter.
