FREE Water + Energy Saving Kits

Tap by Tap offers FREE Water and Energy Saving Kits to local residents in participating communities. Kits typically include a high efficiency showerhead, and aerators for your kitchen and bathroom faucets.

Click on your community link in the box to the right to find out where, how and when to pick up your Kit.

With the easy installation of your new fixtures, you'll be enjoying the same steady flow showers and clean dishes but with lower energy bills. Definitely win-win. Plus, by participating in Tap by Tap, you're doing even more good deeds – like reducing greenhouse gases (those generated by your water heating fuel), reducing strain on local water treatment facilities and extending your community's natural water supply.

If your community is not yet participating, find out [How to Get Involved](http://tapbytap.ca/how-get-involved). (<http://tapbytap.ca/how-get-involved>)

Thanks for being part of the solution!

Program Delivery and Sponsorship

Tap by Tap is a program of the non-profit organization [City Green Solutions](http://www.citygreen.ca/) (<http://www.citygreen.ca/>), with funding from participating

governments and utilities. See each program page for specific funding partner information.
